

# Anthem ConditionCare Incentive Program

## Coronary Artery Disease

Through the Anthem ConditionCare Incentive Program for coronary artery disease, your employer is reducing the cost of covered medical services and prescription drugs that help you manage your coronary artery disease. You may save money on some condition-specific doctor visits and certain related prescription drugs.

Your plan may not include benefits for all of these medical services and medications. To find out if a specific medical service or medication on this list is a covered benefit under your plan, see your contract documents or call customer service at the telephone number on the back of your health plan ID card.
