

Performance Results: Community Memorial Healthcenter

Measured from 7/1/08-6/30/09

Many factors contribute to a successful treatment. These charts show which factors this hospital scored especially well on. Each "✓" you see means the hospital scored higher than the Q-HIP average for that measure.

Cardiac Catheterization Measure	
Serious Complications	n/a
Angioplasty Measures	
Heart Attack Diagnosis-to-Angioplasty time < 90 minutes	n/a
Local vascular complications	n/a
Patient prescribed anti-blood clotting drug at discharge	n/a
Patient prescribed cholesterol lowering drug (statin) at discharge	n/a
Serious complications	n/a
Mortality rate	n/a
Heart Attack Measures	
Aspirin at arrival	✓
Aspirin prescribed at discharge	✓
Medication to improve heart pumping	*
Counseling to quit smoking	*
Beta blocker prescribed at discharge	✓
Heart Failure Measures	
Discharge instructions	✓
Heart chamber assessment	✓
Medication to improve heart pumping	✓
Counseling to quit smoking	✓
Pneumonia Measures	
Pneumonia vaccination	✓
Counseling to quit smoking	*
First antibiotic given within 6 hours	
Influenza vaccination	✓
Surgical Care Improvement Project Measures	
Preventive antibiotic given 1 hour before surgery	✓
Appropriate preventive antibiotic selected for surgical patients	✓
Preventive antibiotic stopped within 24 hours after surgery	
Surgical patient received appropriate measures to prevent blood clots 24 hours prior to surgery and 24 hours after surgery	

* The facility did not have enough cases (25 minimum) to reliably calculate performance for this measure.

"n/a" This facility does not perform invasive cardiac procedures.
