

## Introduction

The GenRx Prescription Drug Formulary is a list of generic drugs covered under your benefit. These are commonly prescribed Food and Drug Administration (FDA) approved drugs chosen by Anthem Blue Cross for their value and effectiveness. Drugs not listed on this formulary are NOT covered under your plan.

The GenRx Prescription Drug Formulary is updated biannually and is subject to change without prior notification. To check for regular updates to the formulary, please visit us on the web at [www.anthem.com/ca](http://www.anthem.com/ca) .. You can also contact the Customer Service Center at the number listed on your Anthem Blue Cross ID card. We encourage you to share this drug list with your doctor.

## Generic v Brands

A brand name drug is one that is developed, patented, and marketed by the original drug manufacturer. Until the patent expires, no other companies can produce that same particular brand name drug, which keeps the price relatively high.

A generic drug contains the same active ingredient as its brand name counterpart. A generic drug may be manufactured by various drug companies after the original patent

expires. A generic drug is identical to the brand name drug in dosage form, strength, route of administration, quality, and intended uses. Generics may differ from their brand name equivalent in color and/or shape. However, both brands and generics have to meet the same strict safety, purity, and performance standards governed by the FDA.

## Quantity Limits

In order to minimize the potential for adverse drug reactions due to over-utilization, Anthem Blue Cross has implemented an upper dispensing limit on select medications. These quantities were determined based on the FDA dosing recommendations. The quantity limits adopted by Anthem Blue Cross should allow for a medically appropriate quantity for most conditions. However, if your doctor has determined that it is medically necessary for you to take a larger amount, please ask your doctor to submit a prior authorization of benefits request to have the additional amount reviewed for coverage.

## Prior Authorization of Benefit Coverage Program

This program is designed to encourage appropriate and cost-effective use of medications. Drugs included in this program are generally those that have a high side

effect potential, those that should be reserved for a specific FDA indication, or those that have a high misuse or abuse potential. If your doctor prescribes a medication that requires prior authorization for benefit coverage, please ask your doctor to complete a Prior Authorization of Benefit Form and submit it to Anthem Blue Cross. To obtain a list of drugs that require Prior Authorization for Benefit Coverage, please contact the Customer Service Center at the number listed on your Anthem Blue Cross ID card.

## Narrow Therapeutic Drugs

Certain medications require that your physician carefully monitor the dosage that you are on to achieve optimal effect while preventing adverse side effects. For these select few drugs, it is recommended that you NOT switch between the brand and generic versions of the drug. If you are already on a generic version, it is recommended that you continue taking the generic version. If you are already on the brand name version, it is recommended that you continue taking the brand name drug.

The following is a list of some narrow therapeutic index (NTI) drugs:

Armour Thyroid,  
Gabitril, Pacerone,  
Lanoxin, Synthroid,  
Topamax, Dilantin,  
Coumadin, Eskalith,

Neoral, Zarontin,  
Lithobid, Keppra,  
Cellcept, Clozaril,  
Lamictal,  
Depakote/ER,  
Mysoline,  
Tegretol/XR,  
Trileptal, Carbatrol,  
Banzel and  
Zonegran

Your pharmacy benefit will provide coverage for these brand name medications if you are currently on a brand name version. For a complete list of NTI drugs, visit [anthem.com/ca](http://anthem.com/ca).

## How to Use This Guide

The first column lists the **brand name** or common name of a given drug, and is for **reference purposes only**. With the exception of a few narrow therapeutic index drugs and some insulins, brand name medications are NOT covered under your pharmacy benefit plan.

The second column lists the **generic name** or the name of the active ingredient(s) of the drug.

Your benefit plan provides coverage for these generic medications.

If your physician prescribed a medication that does not appear on this list, the medication may not be covered under your pharmacy benefit. Please share this list with your doctor and ask him/her to prescribe a generic alternative drug that is medically appropriate for your condition and is listed on this Formulary.

## Contact Information

Please call the Member Services number on your ID card if you have questions about your benefit or questions about the GenRx Prescription Drug Formulary. In addition, you can check for regular updates to the formulary by visiting [anthem.com/ca](http://anthem.com/ca). If you would like to find out if a particular generic drug is covered under your benefit and you do not see it listed here, please call the Customer Service number listed on your Anthem Blue Cross ID card. The hearing and speech impaired may use our TDD number at 1-800-905-9821 for additional information. Hours of operation are Monday through Friday 7am - 9pm and Saturday 7am - 7pm CT.

| <b>Brand<br/>For Reference Only</b> | <b>Therapeutic Class</b> | <b>Generic<br/>Covered by Plan</b> |
|-------------------------------------|--------------------------|------------------------------------|
| Actiq                               | Analgesics               | fentanyl lolli-pops                |
| Amerge                              | Analgesics               | naratriptan                        |
| Anaprox                             | Analgesics               | naproxen sodium                    |
| Ansaid                              | Analgesics               | flurbiprofen                       |
| Arava                               | Analgesics               | leflunomide                        |
| Arthrotec                           | Analgesics               | diclofenac/misoprostol             |
