

Life insurance is *more* than extra insurance

Anthem[®]Life

Peace of mind
and financial
protection
for your family

Whether you are older or younger, married or single, have children or not, life insurance can help provide financial wellness for your loved ones — yet only half of Americans have coverage.¹

Why?

67% of people without insurance think they have more important financial priorities — **56% feel they don't need it.**¹

65% of people think life insurance is too expensive, but **it can cost less than a gallon of gas a week.**¹

Help when it's most needed

If the unthinkable ever unfortunately happens, life insurance can help pay for:

Funeral costs

Bills

Larger debts,
such as a mortgage

Our life products, combined with best-in-class service and support, provide flexibility to help meet a variety of needs:

Basic life

Accidental death and
dismemberment

Supplemental life

Voluntary life

More Americans receive their life insurance **through their employer** instead of buying it on their own.²
