

Prescription Program

Drug List — To be used by members who have a 3 tiered drug plan in Maine.

Anthem Blue Cross Blue Shield prescription drug benefits include medications available on the Anthem Drug List. Our prescription drug benefits can offer potential savings when your physician prescribes medications on the drug list.

For more information about your drug plan, you can do the following:

- Go to [anthem.com](https://www.anthem.com)
- Call customer service at the number on your ID card
- Speech and hearing impaired users (TDD/TTY) should call 800-221-6915, Monday – Friday, 8:30 a.m. – 5:00 p.m., ET
- Bring a copy of this drug list to your next doctor's visit to help you and your doctor select the lowest cost medicine

KEY FOR DRUG LIST

Tier 1 – Lowest copayment – Drugs that offer the greatest value compared to others that treat the same conditions. Some of these are generic versions of brand-name drugs.

Tier 2 – Medium copayment – Brand-name drugs that are generally more affordable. Drugs may also be on this tier because they are “preferred” among other drugs that treat the same conditions. This may be based on how well they work, if they have less side effects, if they're more affordable, etc.

Tier 3 – Highest copayment – These are higher cost brand-name drugs. Some Tier 3 drugs may have generic versions in Tier 1 and may cost more than the generic versions on lower tiers.

ANTHEM BLUE CROSS AND BLUE SHIELD DRUG LIST

Your prescription drug benefit includes coverage for medicines that you'll find on the Anthem Drug List. You can often find more savings when your doctor prescribes medicine that is on our drug list. Here are some commonly asked questions and answers about how the drug list works with your prescription drug plan.

Q. *What is a Drug List?*

A. The Anthem Drug List, also called a formulary is a list of U.S. Food and Drug Administration (FDA)-approved brand-name and generic drugs that have been reviewed and recommended for their quality and how well they work. The review is done by the National Pharmacy and Therapeutics (P&T) Process. The P&T Process is performed by an independent group of practicing doctors and pharmacists in charge of the research and decisions surrounding our drug list. This group meets regularly to review new and existing drugs and they choose the top drugs for our list—based on their safety, how they work and their value.

Because the drugs on our list are reviewed from time to time, it's a good idea to check the list to find out if any drugs have been added or removed. You can do this by going to [anthem.com](https://www.anthem.com).

Q. *What are Tiers?*

A. Drugs on the Anthem Drug List are grouped into tiers. There are several factors that are used to determine under which tier a drug will be put in. This can include (but it's not limited to):

- Cost of the drug
- Cost of the drug in comparison to other drugs used for the same type of treatment
- Availability of over-the-counter options
- Other clinical and cost factors.

Q. *What is a brand-name drug?*

A. These are drugs that are developed by a company who holds the rights to sell them. When the rights expire, other drug companies can make their own version of the drugs (see generic drugs below). You may be more familiar with brand-name drugs through advertising or because you know people who take them.

Q. *What is a generic drug?*

A. Generics are simply copies of brand-name drugs. Brand-name and generic drugs have the same active ingredients, strength and dose. And the FDA requires that generic drugs meet the same high standards for purity, quality, safety and strength. With generics, you get the same quality for less money.

Q. *What if my doctor or I choose a brand-name drug when a generic version is available?*

A. In most cases, you would be responsible for the Tier 1 copay plus an additional cost share for the cost difference between the brand-name medication and the generic version.

Q. *What are “clinically equivalent” medications? How does this affect my drug coverage?*

A. When drugs are compared in studies, some drugs have been found to be just as effective as others. These drugs are called “clinically equivalent” so it means they work just as well. Part of the P&T Process is to review the most current studies to see if multiple drugs used to treat a disease or a condition have the same effect on a patient. When this is the case, the Process review team may suggest that we cover only the lower cost drug (so we can help keep the overall cost of care as low as possible). This means your specific drug plan may not cover some drugs (indicated by a ^ symbol next to the drug name) that have clinically equivalent options.

Q. *What if my medication is not on the drug list?*

A. You may want to first check with your doctor about prescribing a drug that is on the drug list. If your doctor prescribes a drug that's not on the drug list, you will need to pay the copayment that applies to drugs that are not on the list.

Q. *Can I request that a drug be added to the drug list?*

A. You or your doctor can put in a request to add a drug to the drug list. You can do this either in writing or on our website. Requests are reviewed by the P&T Process team during the drug list review. **Please note that if a drug request is approved, it does not guarantee coverage. Some drugs, such as those used for cosmetic purposes, may be excluded from your benefits. Please refer to your insurance Certificate or Evidence of Coverage to know for sure.**

Tier 1

Abacavir	Aspirin/caffeine/ butalbital	Carbidopa/levodopa	Desloratadine QL	Escitalopram DO, QL	Glipizide XL

KEY

† = A generic equivalent of this drug recently became available or will be available soon. After the generic drug becomes available and notification requirements are met, this brand-name drug will become Tier 3 or may no longer be covered by your prescription drug plan. Check anthem.com to find out about changes in tier status.

^= This product has clinically equivalent alternatives included on the drug list and, as a consequence, such product may not be covered under your pharmacy benefit. Please consult your on-line pharmacy account through your health plan website, anthem.com, for details on coverage.

~ = Preferred step therapy drug; drug has been chosen to be tried first when treating some conditions.

PA = PRIOR AUTHORIZATION REQUIRED. Prior authorization is the process of obtaining approval of benefits before certain prescriptions may be filled.

QL = QUANTITY LIMITS. Certain prescription drugs have specific quantity limits per prescription or per month.

ST = STEP THERAPY REQUIRED. You may need to use one medication before benefits for the use of another medication can be authorized.

Please note: Foradil and Serevent are safety edits that prevent duplication of therapy.

ST^o = STEP THERAPY MAY BE REQUIRED. You may need to use one medication before benefits for the use of another medication can be authorized. This step therapy may not be required if there is a history of a paid claim for this medication in the prior 6 months.

DO = DOSE OPTIMIZATION REQUIRED. Normally involves the conversion from twice-daily dosing to a once-daily dosing schedule.

Not all medications and not all plans are subject to prior authorization and quantity limits. For more information regarding prior authorization or quantity limits, contact Member Services at the telephone number listed on your identification card.

For more information, please visit anthem.com.

- If you have additional questions about your prescription benefits please call the Member Services number on your ID card
- Speech and hearing impaired (TDD/TTY users) should call 800-221-6915, Monday – Friday, 8:30 a.m. – 5:00 p.m., ET
- For the most current version of this prescription drug list, please visit anthem.com
- Bring a copy of this drug list/formulary to your next doctor's visit to assist in selecting the lowest cost medications
